

Character

Walk 03

Don't Call me by my name

The place happens in HLM Bienville there are community apartments where people with low resources leave, there are a lot of women and families living there what ive realized is that a lot of this families they have been years here in Canada without documents. It was just when ive created the link with this women that she told me her story and how she fears to the OUTSIDE world.

NUMBERS

I wanted to work with the non identity, this women is almost naked living in a place behind bars like the structures we see on the space.

Scared to go out of this space because in the outside she feels insecure...

This is the only character that feels safe HOME because she could go by without identity..

When she leaves home she is NOTHING...for society. The only thing she has is her apartment NUMBER.

I would like to Portrait an image outside of this space behind the bars where we see this character almost naked without identity.
Having in her hands a carboard with her apartment number.
